Quick Scripts

2º Use o campo pesquisa para procurar pelo **NOME DE USUÁRIO** // Clicar em cima do resultado e depois em ACTIONS

The screenshot shows the AmpViewer interface. On the left is a sidebar with navigation links: Home, Remote Control, Downloads, Scripts, Device Details, User Options, Admin, Organization, Branding, API Keys, Server Logs, Server Config, Account, Log out, and About. The main area is titled 'Devices'. It has a 'Device Group' dropdown set to 'All', a 'Sort' dropdown set to 'Device Name', and a checkbox for 'Hide offline devices' which is checked. There are 'Select All' and 'Refresh' buttons. On the right, there is a search bar with the text 'samara' and a red circle '1' above it. Below the search bar are pagination controls showing 'Page 1 of 1' and '25 per page'. In the center, a device modal is open for 'SUZANO-1-7', marked with a red circle '2'. The modal shows details for the user 'samara-feitosa' (marked with a red circle '3'), platform 'Windows', disk usage (62%), total storage (111 GB), memory usage (62%), total memory (5.88 GB), and CPU usage (1%). Below this, there are fields for 'Device ID' (cf658c47-13fe-4054-93de-416fa6d830f7), 'Agent Version' (2023.02.14.2047), 'Last Online' (10/02/2023 12:36:14 +00:00), 'Public IP' (177.188.182.91), and 'Device Alias'.

3º Irá apresentar os campos:

- Chat (só para enviar msg)
- Remote Control (controle remoto do pc)
- ViewOnly (Somente visualizar o que pessoa está fazendo)
